

GROUP 13: BORON FAMILY

Element Symbols	B, Al, Ga, In, Tl, Uut
# of Valence Electrons	3 electrons in outer shell
Metal, Nonmetal, or Metalloid	All are metals except Boron, which is a metalloid.
Reactivity	Reactive
Properties	Many have a role in the ecosystem; all are soft (except Boron); good conductors of heat and electricity (except Boron)
State of Matter at Room Temperature	All solid
